

BCA Tutorial Student Version for Swokowski/Coles Precalculus: Functions and Graphs

This text-specific, interactive tutorial software is delivered via the web (at <http://bca.brookscole.COM>) and is offered in both student and instructor versions. Like BCA Testing, it is browser-based, making it an intuitive mathematical guide even for students with little technological proficiency. So sophisticated, its simple, BCA Tutorial allows students to work with real math notation in real time, providing instant analysis and feedback. The tracking program built into the instructor version of the software enables instructors to carefully monitor student progress.
