

Laboratory Explorations to Accompany Microelectronic Circuits, Sixth Edition (The Oxford Series in Electrical and Computer Engineering)

Designed to accompany Microelectronic Circuits by Adel S. Sedra and Kenneth C. Smith, Laboratory Explorations invites students to explore the realm of real-world engineering through practical, hands-on experiments. Taking a learn-by-doing approach, it presents labs that focus on the development of practical engineering skills and design practices. Experiments start from concepts and hand analysis, and include simulation, measurement, and post-measurement discussion components. A complete solutions manual is available to adopting

instructors.~~~~~FEATUR
 RES* Includes clear and concise experiments of varying levels of difficulty
 * Challenging Extra Exploration sections follow each experiment * Each experiment is conveniently designed to fit into a 2- or 3-hour lab period and can be completed using minimal equipment* Also compatible with National Instruments myDAQ, giving students the opportunity to complete assignments outside of the traditional lab environment~~~~~PACK
