

When Winter Turned Red

The forest that once was green has been colored black by killing machines, but dirty paws and furry friends will take down the queen bee, and her men... Years upon years ago, a war shattered the forest, the War of the Red Winter. The Bees were conquering the sky that once belonged to the Birds, and were even slaughtering the creatures of the forest. But one lone wolf was destined to bring the war to an end. The Talking Trees told her to fight, fight for the forest, fight for the Birds and all the forests creatures, fight for her right to be a free, lone wolf... This is the story of Dirty Paws.
