

## Marsupials (Looking at Small Mammals)

A companion series to Looking at Minibeasts and Looking at Plants, this series takes a close look at the many diverse species of small mammals from around the world. Learning about their habitats, eating habits and how they rear their young, children will become acquainted with a wide range of animals. They will also discover the dangers confronting these special animals in the modern world and how we can all work to save them. Each book contains a table of contents, glossary and an index.
