

Osler's Web: Inside the Labyrinth of the Chronic Fatigue Syndrome Epidemic

For more than a decade a devastating disease has been allowed to spread through our country - unchecked, insufficiently researched, and all but ignored, if not denied, by the medical establishment. In many circles this disease, still known as Yuppi Flu, is dismissed as a psychological aberration. For the nearly two million people who have endured its traumatic and very real debilitating physical effects, however, Chronic Fatigue Syndrome is no joke.
