

Reconstructive Knee Surgery (Master Techniques in Orthopaedic Surgery)

This volume of the prestigious Master Techniques in Orthopaedic Surgery series presents the most advanced and successful techniques for reconstructive knee surgery. The book is written by the leading surgeons, who discuss each surgical procedure as if they were working side by side with the reader—explaining the indications and rationale for the procedure, giving step-by-step instructions on technique, identifying pitfalls and potential complications, and offering valuable tips for improving surgical results. This volume is thoroughly illustrated with full-color intraoperative photographs, as well as drawings by a noted medical illustrator and radiographs. A slide set for this volume is also available.
