

Trigonometry: A Unit Circle Approach, Books a la Carte Plus MyMathLab with Pearson eText -- Access Card Package (9th Edition)

Books a la Carte are unbound, three-hole-punch versions of the textbook. This lower cost option is easy to transport and comes with same access code or media that would be packaged with the bound book. Mike Sullivan's time-tested approach focuses students on the fundamental skills they need for the course: preparing for class, practicing with homework, and reviewing the concepts. In the Ninth Edition, *Trigonometry: A Unit Circle Approach* has evolved to meet today's course needs, building on these hallmarks by integrating projects and other interactive learning tools for use in the classroom or online. New Internet-based Chapter Projects apply skills to real-world problems and are accompanied by assignable MathXL exercises to make it easier to incorporate these projects into the course. In addition, a variety of new exercise types, Showcase Examples, and video tutorials for MathXL exercises give instructors even more flexibility, while helping students build their conceptual understanding. This Package Contains: *Trigonometry: A Unit Circle Approach, 9e*, (a la Carte edition) with MyMathLab/MyStatLab Student Access Kit
