

## Extras

Extras, the final book in the Uglies series, is set a couple of years after the mind-rain, a few earth-shattering months in which the whole world woke up. The cure has spread from city to city, and the pretty regime that kept humanity in a state of bubbleheadedness has ended. Boundless human creativity, new technologies, and old dangers have been unleashed upon the world. Culture is splintering, the cities becoming radically different from each other as each makes its own way into this strange and unpredictable future . . . One of the features of the new world is that everyone has a feed, which is basically their own blog/myspace/tv channel. The ratings of your feed (combined with how much the city interface overhears people talking about you) determines your social status--so everyone knows at all times how famous they are. As Scott Westerfeld explored the themes of extreme beauty in the first three Uglies books, now he takes on the world's obsession with fame and popularity. And how anyone can be an instant celebrity.
